ADIF INTERNATIONAL
CUSTOMIZED RAIL SOLUTIONS
PROVIDING EFFICIENT SOLUTIONS FOR YOUR RAIL MOBILITY NEEDS
ADIF IN A NUTSHELL

Adif, the Spanish railway infrastructure manager, is a public entity attached to the Ministry of Public Works and Transport.

We manage and maintain a 15,000 km long rail network and 2,000 stations and freight facilities. Over the last 25 years all of our facilities have been significantly renovated and modernized through major investments.

We designed, built and maintain one of the largest high speed networks in the world, using state-of-the-art technologies and meeting the most demanding safety and reliability international standards.

Commuter lines and medium and long distance circulations are also capital to ensure mobility. Adif has the largest expertise constructing new conventional lines or upgrading the existing ones. Including for this purpose items such as the electrification; more reliable and safety-guaranteeing signalling systems and new traffic operations systems.

We rely on a team of 13,000 professionals.

We are leaders in every field of railway systems development.

We cooperate closely with the world-renowned Spanish rail industry and technological companies.

According to the World Economic Forum, Spain’s railway infrastructures ranked among the world’s top four.
CUSTOMIZED TRANSPORT PROJECTS THAT DELIVER RESULTS

SMART SOLUTIONS FOR MOBILITY

- Design and implementation of new high speed rail systems.
- Modernization and upgrading of conventional rail networks.
- Urban mobility and high capacity commuter lines.
- First class project management for railways.

CUSTOMER-ORIENTED SERVICES

- In-depth customer insight.
- Comprehensive services for the rail value chain.
- Global perspective.
- Professional skills development for both executive and railway workers.
SPANISH RAILWAY EXPERTISE

WORLD-CLASS REFERENCES

- Wide experience in the development of the Spanish high speed network.
- Spanish know how, top-notch engineering and technical experts in railways.

INNOVATION AND QUALITY

- Growing portfolio of innovative solutions in cooperation with the Spanish rail industry.
- High quality solutions.

ADVANCED TECHNOLOGIES

- Cutting-edge technologies transferred to the market.
